As a Full-stack developer with a decade of experience, I have been privileged to work on a variety of projects that have pushed the boundaries of what technology can achieve. From crafting Native Mobile and Desktop applications to designing Full Stack Web Development projects, my experience in **JavaScript/Typescript** has been instrumental in bringing these innovative ideas to life.

Company: Northern Trust

Role: Senior React Native Engineer

Type: Contract

Stack: React Native TypeScript React-Query
RTL Jest Detox

Dates: Oct 2023 - Present

At present, I am working with Northern Trust to deliver a white-label investment platform application for their business users. Daily I am working in a team of 5 developers, working on the development of screens and re-designing the current API to be more suitable for a mobile experience.

Company: Sky

Role: Tech Lead

Type: Contract

Stack: React Native TypeScript Redux
GraphQL RTL Jest Dynatrace
AppCenter

Dates: Feb 2023 - Sept 2023

I worked on Sky's innovative MySkyApp project, focusing on ensuring precise acceptance criteria for technical tasks and advising on the best technical strategies. I also mentor junior developers, helping them with their tasks, fostering problem-solving, improving developer experience, and promoting knowledge sharing to streamline our project workflow. My commitment to teamwork and inclusion significantly benefits the team.

Company: Moonpay

Role: Senior React Native Developer

Type: Contract => Perm

Link: <https://www.moonpay.com/>

Stack: TypeScript React Native NextJS
NestJS CircleCI Fastlane AppCenter
Testflight Play Store

Dates: Jan 2022 - Dec 2022

I worked with Moonpay to build their mobile wallet for Crypto and NFTs. It was a greenfield project in which I set up the base application (TypeScript, RTL, Context) and CI set up using CircleCI → Fastlane → Microsoft AppCenter, Testflight and Play Store as well as working on the API side using Next/Nest JS.

Company: Learning Islands

Role: React Native

Type: Consultant

Link: <https://learningislands.com/>

Stack: React Native Typescript Firebase
Storybook

Dates: June 2022

I worked with an agency to review their application source code, assist them in fixing issue and suggest changes to make their application more performant and fix bugs.

Company: Snaptrip
Role: React Native
Type: Consultant
Link: <https://www.snaptrip.com/mobile-app>
Stack: React Native Typescript Sentry
Segment React-Testing-Library Jest
Dates: Feb 2022

I spent some time with an agency assisting them in with fixing bugs and various feature issues in their application as well as providing a code audit.

Company: Walmart
Role: React Native
Type: Contract
Stack: React Native Typescript GraphQL
Appium Jest
Dates: Sept 21 - Dec 21

I helped develop Walmart's staff app for daily management tasks like messaging, shift swaps, and scheduling. My role was in a small team focused on the scheduling features. I wrote end-to-end tests using a custom framework based on Appium for testing on both real and simulated devices, and I also wrote unit tests in Jest.

Company: Blockasset
Role: Lead Developer
Type: Contract
Link: <https://blockasset.co/>
Stack: React Gatsby Typescript Solana
Blockchain NFT MmetaPlex Web3
Dates: Sept 21 - Dec 21

I assisted Blockasset set up and launch their NFT platform on Solana. This includes setting up the landing page, minting the NFTs and setting up the smart contract interaction on Solana blockchain with a candy-machine on Metaplex.

Company: JP Morgan Chase & Co.
Role: Senior React Native
Type: Contract
Stack: React Native TypeScript GraphQL
ally Detox Jest
Dates: Apr 21 - Sept 21

I worked with JP Morgan Chase on a Neo-Bank product, creating an application (currently in Beta) that will allow users to open and manage their account.

Working closely with multiple teams in different domains, developing new features and focusing on accessibility within the application.

Company: Nandos
Role: Senior React Native
Type: Contract
Link: <https://apps.apple.com/gb/app/nand...>
Stack: React Native Typescript Redux
Redux-Sagas Detox Jest GraphQL
Dates: Aug 20 - Apr 21

I worked with Nandos to bring their React Native application up-to-date with Order-at-Table feature, integrated delivery and integrating a new payment system with Stripe along with the ability to pay with Native Payment (Apple Pay, GPay).

Company: EyeCamdy / Santander
Role: WebXR Developer
Type: Contract
Link: <https://www.santanderar.com/>
Stack: Three.js WebGL 8th Wall WebXR
Dates: Feb 21

Worked on developing a WebAR experience for Santander's Fraud Awareness campaign.

Company: PHE - Public Health England
Role: Full Stack Developer
Type: Contract
Stack: Ruby-on-Rails Postgres
Data Visualisation Three.js
Dates: Apr 20 - Aug 20

Working with PHE on developing the Test and Trace platform creating admin dashboards and utilities to upload and analyse the data coming in from labs and test sites from around the UK and then generating reporting for the days results & assisting call centers for human tracing.

Company: VerifyEd
Role: Lead Developer
Type: Contract
Link: <https://www.verifyed.io/>
Stack: Node React XRP Ledger AWS
Dates:

I created the MVP for VerifyED, which is used in the world of trusted certificates and credentials across educational and professional sectors.
